

Group Contribution Statement & AI Disclosure

Tiago HAGEN, Marco ANTON, Nizami AZIZOV, Louisa DJEBROUN

2026-07-21

Contributions

Group Members

Louisa DJEBROUN — Logistic Regression and Repository Organisation

Primary responsibilities: - Performed the logistic regression analysis to answer Research Question 2. - Presented the regression results using a formatted `gt` table. - Played a major role in data cleaning and organising the project repository.

Collaborative contributions: - Contributed to dataset documentation, exploratory data analysis, visualisations, interpretation of results, and final editing.

Marco ANTON — Data Cleaning

Primary responsibilities: - Led the data cleaning process, including variable recoding and preparation of the analysis dataset. - Ensured the cleaned dataset was consistent for subsequent analyses. - Minucius investigation by Exploratory Data Analysis

Collaborative contributions: - Contributed to dataset documentation, exploratory data analysis, visualisations, and interpretation of results. - Reviewed code and final project content.

Nizami AZIZOV — Quarto Rendering and Repository Management

Primary responsibilities: - Resolved Quarto rendering issues and website build errors. - Solved Git merge conflicts and helped maintain the project repository. - Proposed enhancements by the plotts

Collaborative contributions: - Contributed to dataset exploration, exploratory analysis, visualisations, and reviewing the project. - Assisted with debugging and repository organisation.

Tiago HAGEN — Confirmatory Analysis, Quarto Website Structure

Primary responsibilities: - Performed the inferential analysis to answer Research Question 1 using the slope statistic. - Structured and organised the Quarto website. - Worked on integrating the different project pages and resolving website structure issues.

Collaborative contributions: - Contributed to dataset exploration, data cleaning, exploratory data analysis, and visualisations. - Reviewed code, interpretations

AI Tool Disclosure

We used the following AI tools in this project.

Tool	Purpose	Scope
ChatGPT (OpenAI)	Assistance with R programming, debugging, Quarto formatting, Git troubleshooting, statistical method selection, interpretation of results, and report writing	
Gemini	Correction of merge conflict and webpage render	

All AI-generated code, text, and suggestions were reviewed, tested, and verified by one or more group members before being included in the final project.
